

# QLaser Solutions - June 2009

## "Referralmania" Update

Sorry, no one played in May, so I'm writing a \$25 check to The Rapid City Boys Club as a donation. However, I have written over \$4,800 in referral checks so far this year ... if you haven't received your share, get involved and play *Referralmania* this month. It's easy to play - just follow the simple instructions at the end of this newsletter.

## *Laser Training with Dr. Larry Lytle*

Note: the opinions and ideas presented in the "Laser Training with Dr. Larry Lytle" section of this newsletter are those of Dr. Lytle only. No medical treatment claims are made or implied by the manufacturer of this laser equipment, Business Wizards, Inc., QLaser Solutions, nor any distributor associated with this equipment. This equipment is sold and intended for veterinary use.

### **Tinnitus & Hearing Loss**

I recently came across this protocol for using low level laser therapy for hearing loss. As you can see she uses both the 808 and 660 for longer periods of time and for a total of 20-24 sessions. I assume these are weekly session and I do not know how she determines when to treat 4 minutes or 16 minutes.

*The treatment should be carried through 20-24 sessions, at least 12 sessions. I use the 808 nm for 4-16 minutes and then use the 650 nm for 16-28 minutes.*

If you have tinnitus or hearing loss and are not getting results using the protocol in my *Laser Users Manual*, you may want to try increasing the treatment times as shown above. This is a good protocol but all if you need to emphasize getting blood flow back to the ears and getting the head of the condyle down and forward with MBTs.

### **RESULTS OF LOW LEVEL LASER THERAPY (LLLT) IN THE TREATMENT OF INNER EAR DISEASES**

L. Wilden\* and D. Ellerbrock\*\* \*Private Office, Bad Füssing, Germany \*\* Laser Evolution-Light Energy Healing, Passau, Germany

The increase of LLL energy quantities in the treatment of a large number of patients has proven a very effective biostimulative result. The energy was transmitted with 3 laser diodes (830nm) and 3 diodes (635nm) via meatus and mastoid. Before every series of LLLT the patients hearing capacity (air and bone conduction) was examined by an audiometry test. After the 9 th therapy the hearing capacity was again examined by the same method. Improvements of the hearing capacity were ascertained in all frequency sectors. The best results were obtained in the low frequency sector (reduction of 11.7 db) and in the high frequency sector (reduction of 14,6 db). The therapy results were better when more energy was transmitted. The correlation of the patients age and the duration of the disease on one

hand, and the therapy results on the other, are biologically plausible. If LLL is transmitted in suitable energy quantities to the inner ear (cochlea) biostimulative effects can be well documented.

*I am interested in hearing about whether your laser would help **hepatitis c** in any way.*

While we cannot and don't make specific medical treatment claims in this area, you may find the following information helpful. The following is from the CDC's website: *Hepatitis means inflammation of the liver. Toxins, certain drugs, some diseases, heavy alcohol use, and bacterial and viral infections can all cause hepatitis. Hepatitis is also the name of a family of viral infections that affect the liver; the most common types in the United States are hepatitis A, hepatitis B, and hepatitis C. Hepatitis C is a contagious liver disease that results from infection with the hepatitis C virus. It can range in severity from a mild illness lasting a few weeks to a serious, lifelong illness. Hepatitis C is usually spread when blood from a person infected with the hepatitis C virus enters the body of someone who is not infected. Most people become infected with the hepatitis C virus by sharing needles or other equipment to inject drugs. Hepatitis C can be either "acute" or "chronic." Acute hepatitis C virus infection is a short-term illness that occurs within the first 6 months after someone is exposed to the hepatitis C virus. For most people, acute infection leads to chronic infection. Chronic hepatitis C is a serious disease than can result in long-term health problems, or even death. There is no vaccine for hepatitis C. The best way to prevent hepatitis C is by avoiding behaviors that can spread the disease, especially injection drug use.* Here is what Dr. Lytle has to say about it in his *Laser Users Manual*: "Liver Disorders – many liver disorders are due to toxicity and respond to detoxifying the liver (and body) and then using Mode 3 of the Q1000 directly over the liver for one cycle every day for 7-10 days and then every other day as needed until improvement." CDC defines Hepatitis as "inflammation of the liver." The QLaser can be especially effective in helping to reduce virtually all types of inflammation.

*To make a long story short, I have had **Right shoulder discomfort** since, Nov. 28, 2008. I have been going to 2 chiropractors and 1- MD. For the last*

*several months, I would get some relief after adjustments, but the next day or so the discomfort was back, discomfort ranged any where from 1 to 8 on the pain scale (10 being the worst). On Monday I had an MRI- the results. 1) Arthritis in the AC Joint and some bone spurs; 2) Mild case of bursitis; 3) tendinitis or mild strain of tendon. Last night I starting to use the Q1000.... on the shoulder, I don't know why I didn't start sooner! Do you have any recommendations for using the Q1000, I do have 808 probe as well. Any advice would be helpful*

The combination of your Q1000 and 808 Enhancer should definitely help. Follow the "Shoulder" protocol in the **Laser Users Manual** increasing the time if needed (based on pain reduction) up to a full cycle around the shoulder. Basically, you will be lasering the muscles around the shoulder with your Q1000, mode 1 and then using the 808 Enhancer in the joint itself. Use the Pre/Post Pain Assessment technique (if you don't know what this is, please ask your Distributor for a copy) as a guide to help you better determine the results you are achieving. Use the protocol above as needed.

*All my wife's teeth were removed sometime this January - can Miracle Bite Tabs be used by her? My object of writing now is about my son who is suffering from **Acute Myelogenous Leukemia (AML)** since about one year. It is a malignant disease of hemopoietic Stem Cells. His bone marrow is not preparing the proper blood cells. We have not yet been able to find a stem cell donor to match his cells for a bone marrow transplant. The matter is now serious. Have you any information or knowledge, whether laser therapy could help him. Can it be used on bone marrow to repair it? Any suggestion you give will be appreciated.*

Miracle bite tabs will not work over your wife's dentures. However if she does not improve with daily laser therapy on the proprioceptive points 1 thru 4, there is way to add to the top of the dentures but not with MBTs. I am sorry to hear about your son Raymond's diagnosis of AML. Remember diagnoses are not always correct. The main symptom of AML is "tiredness" and that can be due to many things other than AML - such as Dental Distress Syndrome and malfunction of the adrenal system due to drugs, alcohol, lack of exercise and poor diet. The reason to question all diagnoses is that it gives "hope" and strengthens the immune system. Since the Q1000 works at the cell level there is no doubt that it will help re-build the blood cells. There are some other things that will also help. (1) Fear of the diagnosis of a serious disease is disastrous and further suppresses the immune system. A strong immune system is necessary to "whip" any disease especially

diseases of this nature. To enhance the immune system your son should practice breathing rhythms all day long during his waking hours as outlined in Chapter 10 of my book Energy Transcendence. (2) What is the condition of his teeth – has he lost many molars? If so he MUST immediately order Easy Adjust Proprioceptive Guides and wear them all the time except eating and keep them adjusted daily. Also he must apply the Q1000 laser treatments to the proprioceptive points listed in my manual. This will help in balancing the Autonomic Nervous system which is always involved in autoimmune diseases. (3) Detoxification is MANDATORY. Your son must take Belly Gelly and re-inoculate with GeneFlora daily. (4) Remember the Q1000 laser does not "kill anything" – it rebuilds at the cell level – therefore cells are constantly dying and "dumping" their protein debris extra cellular – this must be cleaned up. The best is Regalzyme – an enzyme that digests extra cellular debris – it is available from your Distributor. Your son should take 3 tablets three times a day between meals on an empty stomach for one month. (5) Your son should drink at least 8 glasses of water treated with Mode 3 of your Q1000 before breakfast along with 3 Regalzyme every day and another 8 glasses through out the day – again along with Regalzyme – take between meals. (6) Your son is undoubtedly tired from this disorder but even if he is tired he still should practice Yoga and stretch as much as possible to enhance circulation. Good Luck!

## Swine Flu

Dr Larry Lytle

April 28, 2009

*NOTE: Everyone for whom we have a current email address received this update at the end of April. If you didn't receive it and would like to update your records to include your email address, please email me at [kip@rapidnet.com](mailto:kip@rapidnet.com).*

CNN, FOX, NBC, CBS, ABC and nearly all of the news media are headlining the impending swine flu pandemic. This wide spread news coverage has the nation and much of the world engulfed in fear. The symptoms of the swine flu are much like the symptoms of any other flu bug - fever, cough, sore throat, body aches, headache, chills and fatigue. Some people have reported diarrhea and vomiting associated with swine flu. In the past, severe illness such as pneumonia and respiratory failure, and even deaths, have been reported with swine flu infection in people. Like seasonal flu, swine flu may cause a worsening of underlying chronic medical conditions.

Swine flu is caused by an influenza type A H1N1

virus and has been reported in the US before. It was first isolated from a pig in 1930 and reported among soldiers in Fort Dix, New Jersey, in 1976 and again in humans in Wisconsin in 1988. There have been just 12 cases reported in the US from December 2005 through February 2009 but in the last week the Center for Disease Control has reported 64 new cases of swine flu in the US - mostly in crowded areas of New York and California.

People do not normally get swine flu, but human infections can and do happen. The CDC says the swine H1N1 virus are antigenically very different from the human H1N1 virus and, therefore, vaccines for human seasonal flu will not provide protection from H1N1 swine flu virus. This statement in itself causes much "fear".

CNN's Dr. Sanjay Gupta, once in the running for U.S. Surgeon General (until he withdrew) says this swine flu bug is different. Instead of it attacking the young, the old, the sick and the weak, it attacks the middle aged with apparently healthy immune systems. Dr Gupta says the main damage is caused by creating an inflammation in the lungs.

The CDC has blinders on and follows the drug companies and main stream medicine thinking the only way to treat swine flu or any other flu is with anti viral drugs and vaccines. Since there is no vaccine for the swine H1N1 virus, panic and fear ensue.

Lets take our blinders off and think out of the box. Everything in the universe has a frequency – a vibration. Owners of the Q1000 laser are knowledgeable about cancelling frequencies and the capability to program cancelling frequencies into an empty mode of the Q1000. Nina Silvers in her book, "Rife Frequencies," lists 413, 432, 663, 839 and 999 as canceling frequencies for the swine flu.

If all the news hype has you worried about the swine flu, call your distributor and ask about having your Q1000 programmed with the Rife swine flu frequencies. Apply these special swine flu frequencies to the nose, throat and lungs for one cycle daily and then every other day as the flu symptoms start to improve.

While I have not had experience or any testimonials concerning the effectiveness of Rife's swine frequencies, I do know the Q1000 will reverse the inflammatory response quickly regardless of what causes it. If Dr. Gupta is correct, I suggest you apply mode 3 of the Q1000 for one cycle on the nose and throat and then apply mode 3 for one cycle over each lung immediately upon feeling any symptoms, such as a burning, itchy, runny nose, eyes or throat or any chest congestion. Better yet – starting today - apply mode 3 in the same manner as a preventive measure before and after coming into contact with groups of people – especially on

air planes.

Remember – NEVER leave home without your laser. Use your Q1000 System as a preventive measure. It will put energy back into the body and build your immune system. You will feel better. When you feel better, there is no place for fear!

## New Testimonials

=====

**Johnson's Tendinopathy**, (inflamed Achilles tendon) An orthopaedic surgeon wanted to operate to realign the foot, and take tendons from my toes to put them in my ankle. Or put an iron brace on my foot. However, my holistic doctor recommended Low Level Laser Therapy. I started off with a pain level of 10/10. I could not touch my ankle without pain. Fifty percent of the improvement was in the first week. After three weeks my pain was down to 2/10, and the sensitivity to touch went. The inflammation came right down, and I walked so much better. Two months later the pain was gone except for an occasional dull ache when lying down. Muriel Robinson, Luton, UK

=====

'I find the Q1000 gets rid of **pain** quicker. It speeds the healing process. If I do a manipulation, the pain is often the same just afterwards, but if I use the Q1000 they feel less pain. The quicker something heals, the less likely it is to recur. If someone feels an 8/10 pain, it will come down to 3/10 with the laser. For back pain I use the laser between the vertebrae on the lumbar spine to work in the disk and the facet joint. Its excellent for **inflammation**. I've also had success with **shingles**. With regular treatment with the laser at home, this woman was able to return to work after just two and a half weeks. I certainly would not be without a soft laser now. It really makes a difference. I have many other therapeutic interventions– ultrasound, a short wave machine and a scener, for example, but it's the soft laser I turn to the most.' R.W. Osteopath, Sussex

=====

**Radiotherapy damage**; jaw and ear pain ten years ago Shauna had radiotherapy after removal of a cancerous saliva gland from her mouth. I had repeated infections, a perforated ear drum, and total deafness in my left ear after the tube which drained the ear had been

damaged by an operation and radiotherapy. It was very painful, as though I had water in my ear, with pressure all the time. After using LLLT, I am now pain free with no pressure inside the ear. With the light I experienced tingling down the side of my face as blood flow increased and muscles relaxed, and I can now fully open my mouth to eat. Before I had to slot food in sideways. I am absolutely thrilled. Not only that, the laser is stopping my daughter's migraines, and sorting out my husband's tense muscles. Shauna Raby, Warrington, UK

=====

**Cartilage and Knee problems.** Before using the Q1000 I would wake nearly every day with excruciating knee pain. Often my knee is very swollen, and painful during my work as a tennis coach. Doctors think the cartilage is damaged, and I have been offered a knee replacement operation. Declining this route, I use the low level laser, and the probe on the sore points, and the pain is reduced. It is less swollen now, and less painful when I wake up. Its still early days, but I am just so relieved not to have to have the operation, and to be able to carry on working. Jo Anan, Tennis Coach, N. London, UK

=====

Being very sensitive to drugs and not finding them to be a reasonable long term therapy, I have looked far and wide for alternative treatments. At first I was skeptical of the Low Level Laser therapy, it seemed too good to be true. I soon found that it had significant effect on my **peripheral neuropathy**, where nothing else worked. I can feel my toes! Then, I was unfortunate enough to have my Q 1000 stolen from me. I gave me perspective on the effects it had on my well being. I was without the laser for 3 weeks and could not wait to get a new one. I have used it on tendinitis, broken toes, thyroid, stomach problems and depression with great success. I want to thank you for your efforts in creating such a wondrous device. Laurie, Palm Springs, California.

=====

One year ago a prospective client called me for a massage to relieve her **chronic shoulder pain**. When I arrived, she exclaimed, "I need massage so much, I will pay in advance for a series of five". She said her shoulder pain was so great that she felt her arm was about to 'fall off' and her range of motion was very limited. During the first massage, I detected scar tissue in the

supra-spinatus muscle which would surely cause pain and limit the rotation of the shoulder. I treated the scar tissue for six minutes with the 808 enhancer and proceeded to give her a 60 minute massage. A week later we met again for the second treatment and she reported that she had considerable reduction in pain and increased range of motion. She got a second massage and another six minute treatment with the QLaser. Then another week went by and at the beginning of her third treatment I asked, "How is your shoulder this week?" She replied, "What? Why do you think there's something wrong with my shoulder?" She had been so completely free of discomfort and restriction that she forgot she had ever been in pain. The results of using the QLaser are miraculous. Joanne M. Johnson, Aspen, CO

=====

We're using the 1000 unit daily in the practice and loving the outcomes! I'm sure you are aware of this, but we have had most amazing recoveries from **costochondritis** using the Q1000. Patients think it's a miracle! Dr Eric Benson, Grand Island, NE

## ***Referralmania!***

### **To Be An Ongoing Feature of QLaser Solutions**

***Referralmania!*** is your chance to help your friends and family learn more about the benefits of QLaser therapy ... and to receive recognition and rewards as the #1 "referral-maniac" of the month. Everyone who plays gets a free PDF copy of two of Dr. Lytle's books ... and, **if you are the months #1 referralmaniac ... you also get a \$25 QLaser Solutions gift certificate!**

It's easy to play. Email me at [kip@rapidnet.com](mailto:kip@rapidnet.com) with "Referralmania" as the subject line and send (1) your personal testimonial and (2) a minimum of five referrals (I only need their name and email address) to me by the 20th of the month. Winners are announced in the next months newsletter.
